Therapeutic Approaches with Babies and Young Children in Care

Observation and Attention

Jenifer Wakelyn

Series: Tavistock Clinic Series

Therapeutic Interventions with Babies and Young Children in Care is about the value of observation and close attention for babies and young children who may be vulnerable to psychological and attachment difficulties. Case studies explore the potential for observation-based therapeutic approaches to support caregivers, social workers and professional networks. A third theme in the book is the roots of observation-based approaches in psychoanalytic infant observation and the contribution of these ways of working to professional training and continuing development.
