Message from the Guest Editors

Over half of young people will experience mental health difficulties during childhood and adolescence. Mental health problems (e.g., depression, anxiety) are one of the leading causes of illness or disability for young people worldwide. Mental health problems in young people have been exacerbated during the COVID-19 pandemic. To effectively support young people's mental health—through self-care, the community, school, or specialist services—we need to be able to monitor and measure child and adolescent mental health. We are calling for papers for a Special Issue on Monitoring and Measurement in Child and Adolescent Mental Health. Primary and secondary (e.g., meta-analysis) research studies are welcome.

Deadline for manuscript
submissions:

15 March 2022

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access:— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), PubMed, MEDLINE, PMC, GEOBASE, Embase, CAPlus / SciFinder, and many other databases.

Journal Rank: JCR - Q1 (*Public, Environmental & Occupational Health*) / CiteScore - Q2 (*Public Health, Environmental and Occupational Health*)
