## LEVEL I TRAINING – June 16, 2022 • 2:00 – 4:30 pm

This workshop provides a comprehensive introduction to the theory and practice of Regulation Focused Psychotherapy for Children (RFP-C). RFP-C is a manualized, psychodynamic intervention for children with externalizing problems, designed to help children and their families understand the meaning of disruptive behavior and to increase effective emotion regulation. In this workshop, you will learn effective assessment and therapeutic techniques for use with children who present with disruptive and defiant behavior, irritability, and emotional dysregulation. Case examples, video of RFP-C sessions, and discussion will illustrate techniques to enhance your clinical practice.

## LEVEL II TRAINING

Level II RFP-C Training consists of four, weekly, 90-minute group meetings with an expert RFP-C practitioner. Attendees must complete Level I training prior to enrolling.

## TRAINERS

Leon Hoffman, MD

Timothy Rice, MD

Tracy A. Prout, PhD
