LEVEL I TRAINING

June 16, 2023 • 2:00 – 5:00 pm

This workshop provides a comprehensive introduction to the theory and practice of Regulation Focused Psychotherapy for Children (RFP-C). RFP-C is a manualized, psychodynamic intervention for children with externalizing problems, designed to help children and their families understand the meaning of disruptive behavior and to increase effective emotion regulation. In this workshop, you will learn effective assessment and therapeutic techniques for use with children who present with disruptive and defiant behavior, irritability, and emotional dysregulation. Comprehensive case presentations including video of RFP-C sessions, offered by two certified RFP-C therapists, will illustrate techniques to enhance your clinical practice.

TRAINERS

Leon Hoffman, MD

Tracy Prout, PhD

Can Buyukasik, MD

Tatianna Kufferath-Lin, PsyD

Julia Giordano, PsyD
